

Abduhalim Abdulhamidov

PHP Backend Developer

Tashkent, Uzbekistan | +998 90 268 0078 | abduhalimdev@gmail.com | abduhalim.vercel.app

SUMMARY

Backend Developer with 4 years of experience designing and scaling production systems. Focused on performance, clean architecture, and automation. Delivered high-load, real-time applications such as ReddeR Taxi (3k users, 1k drivers), implementing caching, real-time updates, and CI/CD pipelines for continuous delivery.

PROFESSIONAL EXPERIENCE

- Redder LLC, Tashkent — Full-Stack Developer (Oct 2023 – Oct 2025)
 - ReddeR Taxi (Sep 2024 – Jul 2025)
 - Backend for ride-hailing app serving 3 000+ riders and 1 000+ drivers.
 - Implemented real-time updates via Laravel Reverb (WebSockets) with channel authentication.
 - Optimized APIs — query count 45 → 6, p95 latency 900 ms → 250 ms using eager loading and Redis caching.
 - Designed RBAC, idempotency handling, pagination defaults; deployed through GitHub Actions with Nginx/SSL and monitoring.
 - ReddeR Logistics (Oct 2023 – Sep 2024)
 - Architected logistics backend (orders, pricing, assignment) using queues and events.
 - Implemented CI/CD pipeline with safe migrations and zero-downtime deployments.
 - Created Swagger and Postman API documentation for integration with mobile team.
- UzhubTeam — Co-Founder / Backend Lead (Jun 2025 – Oct 2025)
 - Developed backend and Filament admin panel for multi-service platform.
 - Planned modular, multi-tenant dashboard for service owners.
 - Deployed on Linux VPS with Redis caching; delivered full API documentation.
- Ekspres Elektron Servis, Andijan — Software Engineer (Feb 2022 – Oct 2023)
 - Automated internal workflows improving efficiency by approximately 70%.
 - Refactored legacy architecture for improved stability and performance.
 - Built and maintained company website using Laravel and MySQL.
- Digital City, Andijan — Backend Developer (Mar 2022 – Dec 2022)
 - Developed multilingual admin panel with RBAC for startup project 'Skerio'.
 - Created RESTful APIs supporting both mobile and web clients.

TECHNICAL SKILLS & EDUCATION

Backend: PHP 8+, Laravel 10, Livewire, REST API, OOP, SOLID, MVC, Filament Admin | **Database:** MySQL (indexes, transactions, optimization), Redis | **DevOps:** Linux, Nginx, Docker (basics), GitHub Actions CI/CD, Horizon queues | **Frontend** (basic): JavaScript, Vue.js, TailwindCSS, AJAX | **Principles:** KISS, DRY, Clean Architecture | **Documentation:** Swagger, Postman

Bachelor's in Software Engineering – Millat Umidi University, Tashkent (2022 – 2026 expected)

LANGUAGES

Uzbek – Native | **English** – B2 (Professional Working Proficiency) | **Russian** – A2 (Beginner)
