Tashkent, Uzbekistan

### SUMMARY

Backend Developer with 3+ years of experience building and scaling production Laravel systems. Strong in high-load API development, real-time features (Laravel Reverb, Redis, FCM), and performance optimization. Experienced in service-oriented and event-driven architectures, Redis queues, and CI/CD pipelines for reliable production delivery.

### WORK EXPERIENCE

**Backend Developer (Remote / Project-based) — ReddeR LLC** Oct 2023 – Oct 2025

- Developed and maintained backend services for **ReddeR Taxi** (10k+ users, 2k+ drivers), including authentication, RBAC, and REST APIs.
- Improved system performance by reducing p95 latency from **900ms** → **250ms** and query count from **45** → **6** through indexing, eager loading, and Redis caching.
- Implemented real-time features including **two-way chat** and live updates using Laravel Reverb (WebSockets) with authenticated channels.
- Integrated Firebase Cloud Messaging for push notifications coordinated via Redis events.
- Designed backend logic for **ReddeR Logistics** using queues, domain events, and asynchronous processing.
- Set up CI/CD pipelines with GitHub Actions, Nginx, SSL, Horizon monitoring, and zero-downtime deployments.

**Co-Founder & Backend Developer — UzhubTeam** Jun 2025 – Oct 2025

- Built the backend of **UzHub** from scratch to production — an all-in-one platform for Uzbeks in Korea (visa support, halal food directory, community services).
- Implemented REST APIs covering users, services, content, and listings.
- Developed **Filament Admin** for managing services, content, and access control.
- Applied Redis caching to improve performance and reduce database load.
- Startup product-development phase prior to formal company registration.

**Software Engineer (Official employment) — Ekspress Elektron Servis** Feb 2022 – Present

- Official role in the **Automated Control Systems (ABT)** department.
- Performed backend development and support for internal software tools.
- Implemented small features, scripts, and improvements to assist internal workflows.
- Worked with databases and existing codebases to maintain and update internal systems.
- Provided technical support for software-related operational tasks when required.

**Backend Developer — Digital City** Mar 2022 – Oct 2022

- Participated in backend development for the startup project **Skerio**.
- Built REST APIs supporting mobile and web clients, including third-party integrations.
- Implemented modules for sports events, live match dashboards, ticketing, and venue listings.

### TECHNICAL SKILLS

**Backend** PHP 8+, Laravel 10, REST API, SOLID, Service/Repository, Event-driven design

**Database** MySQL (indexing, optimization), Redis (caching, queues), Horizon

**Testing** PHPUnit, Larastan/PHPStan, Telescope, Sentry

**DevOps** Linux, Nginx, Docker, GitHub Actions CI/CD, SSL

**Tools** Swagger, Postman, Git, Jira, Filament; basic Vue.js/TailwindCSS

### EDUCATION

2022 – 2026 (Expected) Bachelor's in Software Engineering, **Millat Umid University**, Tashkent

### LANGUAGES

Uzbek (Native) — English (B2) — Russian (A2)
