Tashkent, Uzbekistan

SUMMARY

Backend Developer with 3+ years of experience building and scaling production Laravel systems. Skilled in high-load API development, real-time features (Reverb, Redis, FCM), and performance optimization. Experienced in designing service-oriented architectures, event-driven flows, and deploying CI/CD pipelines for reliable production delivery.

WORK EXPERIENCE

Backend Developer — ReddeR LLC   Oct 2023 – Oct 2025

– Architected backend for **ReddeR Taxi** (10k+ users, 2k+ drivers): admin panel, RBAC, REST APIs, auth, and multi-service modules.
– Reduced p95 latency **900ms → 250ms** and query count **45 → 6** via query optimization and Redis caching.
– Implemented real-time **chat** using Laravel Reverb (WebSockets) with secure channel authentication.
– Integrated Firebase Cloud Messaging for instant push notifications synced with Redis event broadcasting.
– Designed modular backend for **ReddeR Logistics** using queues, domain events, and Redis.
– Deployed CI/CD pipelines using GitHub Actions, Nginx, SSL, Horizon monitoring, and zero-downtime migrations.

Co-Founder & Backend Lead — UzhubTeam   Jun 2025 – Oct 2025

– Delivered backend and **Filament Admin** for a multi-service platform (visa, education, food, blog services).
– Designed modular dashboard with role-based access; deployed on Linux VPS with Redis caching.
– Maintained high code ownership across services as co-founder.

Software Engineer — Ekspress Elektron Servis   Feb 2022 – Oct 2023

– Automated internal workflows, increasing operational efficiency by ~70%.
– Refactored legacy systems using SOLID and layered architecture.
– Developed company website and internal document management system using Laravel + Voyager.

Backend Developer — Digital City   Mar 2022 – Oct 2022

– Built multilingual admin panel with RBAC for the startup project **Skerio**.
– Developed REST APIs for mobile & web clients integrating multiple third-party services.
– Implemented features for sports events, live match dashboards, ticketing, and venue listings.

Technical Skills

Backend	PHP 8+, Laravel 10, REST API, SOLID, Service/Repository, Event-driven design
Database	MySQL (indexing, optimization), Redis (caching, queues), Horizon
Testing	PHPUnit, Larastan/PHPStan, Telescope, Sentry
DevOps	Linux, Nginx, Docker, GitHub Actions CI/CD, SSL configuration
Tools	Swagger, Postman, Git, Jira; Filament Admin, basic Vue.js/TailwindCSS

Education

2022 – 2026 (Expected)   Bachelor's in Software Engineering, **Millat Umidi University**, Tashkent
